Tabell 1.

På side 21, 23, 25 og 27 er tallene i I alt - kolonnen blitt feil for de fleste aldersklassene fra 100 år og oppover. På side 21 er det tilsvarende feil også for aldersklassen 97 og 99 år. Feilene gjelder de aldersklasser der det ikke er menn. Tallene for menn og kvinner hver for seg er korrekte.

Tabell 6.

Tallene for de to eldste aldersgruppene gjelder 67-70 år og 71 år og over. Korrekte tall for aldersgruppene 67-69 år og 70 år og over kan fås ved henvendelse til Statistisk Sentralbyrå, 1.kontor.

# FORORD

I denne publikasjonen gir Statistisk Sentralbyrå en oversikt over folkemengden etter kjønn, alder og ekteskapelig status pr. 31. desember 1974. Oversikten er utarbeidd på grunnlag av det sentrale personregisteret.

For hele landet og for fylkene er det gitt tall for menn og kvinner på enkelte aldersår og med spesifisert fordeling på ekteskapelig status. For handelsområder og handelsdistrikter er det gitt tall bare for aldersgrupper og for hovedgruppene ugifte, gifte og før gifte. For de enkelte kommuner er det denne gang gitt fordeling bare på kjønn og alder, men opplysninger om alder og ekteskapelig status foreligger som utrykt materiale.

Den tradisjonelle inndeling i bykommuner og herredskommuner er sløyfet på fylkesnivå, men til gjengjeld er det tatt inn en tabell som gir folkemengden etter kjønn og alder for kommunetyper innenfor hvert fylke.

En oversikt over folkemengden etter alder og ekteskapelig status i de enkelte kommuner har vært publisert i serien Nye distriktstall.

*PREFACE*

This publication contains data on population by sex, age and marital status at 31 December 1974, compiled on the basis of the central population register.

A detailed distribution by age and marital status is given only for the whole country and for counties, while main groups of age and marital status are given for trade districts. For municipalities, detailed data on age and marital status are available as unpublished tables.

In stead of a distribution by urban and rural municipalities, this publication gives data for population by sex and age for types of municipalities within each county.

Data on population by age and marital status for each municipality have been published in the series New District Figures.

# PRINSIPPER OG DEFINISJONER

Tabellene i denne publikasjonen er framkommet ved en opptelling i det sentrale personregisteret og omfatter personer registrert som bosatt i Norge.

Det samlede folketall ved utgangen av 1974 avviker bare helt ubetydelig fra det tall Byrået tidligere har beregnet på grunnlag av de foreløpige endringstall for 1974. For de enkelte kommuner er det i noen tilfelle litt større forskjeller. En tilbakeregning på grunnlag av opptellingen for 1974 og de reviderte endringstall for 1974 gir for utgangen av 1973 et folketall som stemmer godt overens med det som tidligere er publisert.

Tabell 1 gir en detaljert aldersfordeling for folkemengde i alt og etter kjønn i hele landet, bykommuner, herredskommuner og i hvert fylke.

Tabell 2 viser folkemengden i alt i landet etter kjønn, ekteskapelig status og ettårige aldersklasser.

Tabell 3 viser folkemengden etter kjønn, ekteskapelig status og 5-års aldersgrupper for hvert fylke, og dessuten sammendrag for hele landet, bykommuner og herredskommuner. I denne tabellen er det gitt tall særskilt for hver ekteskapelig status. En sammenlikning med tall for utgangen av 1970 viser f.eks. at det er en betydelig øking i tallet på separerte. Siden det ikke foreligger noen meldeplikt når ektepar som er lovlig separert flytter sammen igjen, kan det være mulig at noe av den registrerte øking ikke er reell. På den andre siden vil tallet på separerte ikke omfatte ektefeller som lever atskilt uten lovlig separasjon.

Tabell 4 gir folkemengden etter kjønn og alder i hver kommune. For barn under 7 år og for personer mellom 65 og 70 år er det gitt tall for hver enkelt aldersklasse. Tallene er ellers gitt for aldersgrupper.

Tabell 5 viser folkemengden etter kjønn, alder og ekteskapelig status i handelsområder og handelsdistrikter. I denne tabellen er separerte, skilte og enker/enkemenn slått sammen i en gruppe "før gifte". Oversikt over avgrensingen av handelsdistriktene er gitt i egen publikasjon i serien Statistisk Sentralbyrås Håndbøker (SSH nr. 13).

Tabell 6 gir folkemengden etter kjønn og alder for kommunetyper i alt og i hvert fylke. Oversikt over klassifisering av kommunene etter type er gitt i egen publikasjon i serien Statistisk Sentralbyrås Håndbøker (SSH nr. 35).

Byrået har i tillegg utrykte tabeller som viser:

a. Folkemengden etter kjønn og ett-årige aldersklasser i hvert fylke og hver kommune
b. Folkemengden etter kjønn, ekteskapelig status og 5-års aldersgrupper i hver kommune
c. Folkemengden etter kjønn, ekteskapelig status og ett-årige aldersklasser i hvert fylke

## *PRINCIPLES AND DEFINITIONS*

The tables in this publication are based on data extracted from the Central population register, and include persons registered as resident in Norway.

The total population at the end of 1974 was nearly the same as previously calculated from provisional figures for changes in 1974.

Table 1 gives a detailed age distribution for the total population and for each sex in the whole country, urban municipalities, rural municipalities and in each county.

Table 2 shows the total population by sex, marital status and single ages.

Table 3 shows the population by sex, marital status and age groups in each county and for the whole country, urban municipalities and rural municipalities.

Table 4 gives the population for each municipality and county by sex and age. The age distribution is by single years of age for children under 7 and for persons aged 65-69, otherwise by age groups.

Table 5 shows the population by sex, age and marital status in trade areas and trade districts.

Table 6 gives the population by sex and age in types of municipalities for the whole country and for each county.

In addition, unpublished data are available on:

a. Population by sex and single ages in each county and municipality

b. Population by sex, marital status and five-year age groups in each municipality

c. Population by sex, marital status and single ages in each county
