Preface

The Statistical Yearbook of Norway 1997 contains summary information on recent developments in most areas of Norwegian society. The yearbook also contains the main figures from other countries selected from international statistics. With the help of 562 tables and 68 figures, Statistics Norway presents a cross-section of these developments in a form most people can use.

This year's edition is the 116th issue and the process of updating the product has continued from 1996. Tables have been simplified and old tables have been replaced with new, more up-to-date tables. These changes reflect the development of Statistics Norway's production of statistics, which in turn is a result of changes in the overall information needs of society.

Statistical Yearbook of Norway 1997 contains 15 new maps based on county and municipal statistics. A separate Norwegian edition of the yearbook is published. Both editions are available in electronic version at Statistics Norway's home page on the Internet, from which it is also possible to download all the tables in spreadsheet format. The yearbook is also available on CD-ROM.

The Statistical Yearbook is a useful reference work at home, in schools, and in professional contexts. The index of tables and figures and alphabetic index at the back of the book make it easy to find information. The source references in the tables also make the yearbook a good starting point for those who are looking for more detailed statistics.

The yearbook is edited by Mr Per Olav Løvbak assisted by Mr Paul André Eidsaae and Mr Lars Rogstad. In addition, a large number of other persons from within and outside Statistics Norway have made important contributions to this edition of the Statistical Yearbook of Norway 1997.

Other products from Statistics Norway

The Statistical Yearbook is only one of many products available from Statistics Norway. Statistics and analyses are distributed through many channels and in many ways. Readers of the Statistical Yearbook will find it useful to learn where they can find more information on the various subjects and areas of interest.

Weekly Bulletin of Statistics is our main external publication, and all recent statistics are presented here. The statistics are simultaneously published on the Internet. The bulletin is published every Thursday and contains up-to-date tables and articles in Norwegian (English summary on Internet).

Statistics Norway otherwise presents its results in various statistical and analytical publications and in electronic form, including on the *Internet*. The address is: <http://www.ssb.no>. Tables and figures from the Statistical Yearbook will also be published here.

The series *Official Statistics of Norway (NOS)*, of which the Statistical Yearbook is part, comprises about 80 publications annually, including the Monthly Bulletin of Statistics, Historical Statistics, Regional Statistics and a number of single topic publications covering most subject areas. Publications in this series are mainly statistical publications with information on data sources, collection and processing methods, statistical standards, etc. Current statistics are also presented in various thematic publications such as *Banking and Credit Statistics*, *Monthly Bulletin of External Trade*, *Building Statistics* (quarterly), *Building Information* and *Current Population Statistics*.

More detailed analyses are published, *inter alia*, in *Economic Analyses* and "Samfunnsspeilet", which are issued nine and four times a year, respectively. The first issue of Economic Analyses contains Statistics Norway's *Economic Survey* for the previous year.

Social and Economic Studies is a series for distributing research results and is primarily aimed at other research institutions. *Statistical Analyses* publishes statistics and analyses aimed at a wider circle of readers.

Scientific publishing of a more preliminary nature is presented in *Discussion Papers*. In addition, Statistics Norway issues a number of *Reports* on the various areas of statistics or research and analyses projects. The *Notes* and *Documents* series are used for publications of a more internal nature and for publications with a limited circulation.

A CD-ROM containing statistics from all the Nordic countries, *Statistic Across Borders*, is issued every year.

Statistics can also be ordered on diskette, on-line or in hard copy form.

Geographical survey

The Kingdom of Norway consists of the mainland, the archipelago of Svalbard and the island Jan Mayen.

The mainland consists of continental Norway and every island, islet and rock within the Norwegian baseline.

Svalbard consists of Bjørnøya, Spitsbergen, Nordaustlandet, Barentsøya, Edgeøya, Kong Karls land, Hopen, Prins Karls Forland and every island, islet and rock situated between 10° and 35°E. longitude and between 74° and 81°N. latitude. By an international treaty (the Svalbard treaty), signed on 9 February 1920, Norway's sovereignty over the archipelago was recognised. On 17 July 1925 the archipelago was officially incorporated into the Kingdom of Norway.

Jan Mayen is an island situated in the northern Atlantic. On 8 May 1929 it was placed under Norwegian sovereignty, and became by law of 27 February 1930 a part of the Kingdom of Norway.

The Antarctic islands Bouvet Island, Peter I's Island and Queen Maud's land (20°W. and 45°E.) on the Antarctic continent are dependencies. They were placed under Norwegian sovereignty by law of 27 February 1930, parliamentary resolution of 23 April 1931 and royal announcement of 14 January 1939, respectively. The dependencies are not part of the Kingdom of Norway.

Geographical delimitation of the mainland and the Kingdom of Norway

Forest and agricultural areas

Forests cover about one third of the country. In Southern Norway the timberline lies at approx. 1,000 metres above sea level. The height of the timberline declines towards the west and the north. In many places in Western Norway the timberline reaches no higher than 300 metres above sea level, while in the far north it disappears, because the timberline is at sea level.

Spruce and pine dominate the coniferous forest areas. Birch trees also grow in large stands in mountainous areas between the conifers and high moors and in low-lying areas in Western Norway and in Northern Norway. Valuable deciduous woods are found in areas where the climate is especially favourable. The forestry picture is changing in many places through, for example, the reversion of former grazing areas into forest and reforestation of deciduous woods.

Forestry is carried out in areas with productive forests, which cover approx. 22% of the land area. Agricultural areas lie in the most climatically favourable parts of the lowlands, and account for between 3 and 4% of the land area.

Grain and fruit growing require hotter temperatures while grass and potatoes are less demanding, and are therefore cultivated farther north and at higher elevations than grain.

STATENS KARTVERK

Annual temperature

Annual temperature (in °C) is used here to denote normal annual temperature, i.e. the average of all annual temperatures recorded in the period 1961-1990.

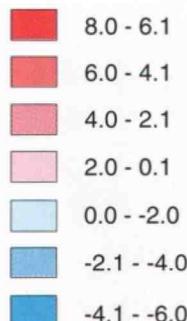

The location of the country on the east side of a large and relatively warm ocean area with predominately western winds, yields a much warmer climate than Norway's northern latitudes would indicate. The annual temperature is therefore the highest along the coast, which has a marine climate with mild winters and comparatively cool summers. The lower annual temperature in Eastern Norway, which has an inland climate with warm summers and cold winters, is caused by the low monthly temperatures in the winter.

The warmest area on an annual basis is the coastal zone from Lista to Stad, while the coolest area in lower-lying areas is the Finnmark Plateau. The annual temperature decreases from south to north, from the coast towards the interior and with increasing elevation.

The meteorological stations in Bergen and Skudeneshavn on Karmøy island have the highest annual temperature, with +7.7°C. The Sihčajávri station on the Finnmark Plateau has the lowest annual temperature in lower-lying areas, with -3.1°C.

STATENS KARTVERK

Annual precipitation

The term annual precipitation means normal annual precipitation, which is the average of the annual precipitation values for the period 1960-1990. Precipitation in a single year can vary substantially from the normal annual precipitation. A precipitation height of 1 mm means that 1 litre of water has fallen on 1 m².

Certain areas in Western Norway are among the wettest regions in Europe. The reason for this is that moist masses of air moving in from the west are forced upwards by the high coastal mountains, resulting in precipitation. The interior of Eastern Norway and the Finnmark Plateau are sheltered from the wind directions causing high precipitation in Western Norway and along the coast farther north to Lofoten.

In Southern Norway, documented precipitation varies from 278 mm at Skjåk in Gudbrandsdalen to 3,575 mm at Brekke in Sogn. In Northern Norway, annual precipitation varies from 282 mm in Dividalen in Troms to 2,935 mm at Brattland in Nordland. The highest annual precipitation values, for example on glaciers, are calculated on the basis of snow amounts.

STATENS KARTVERK

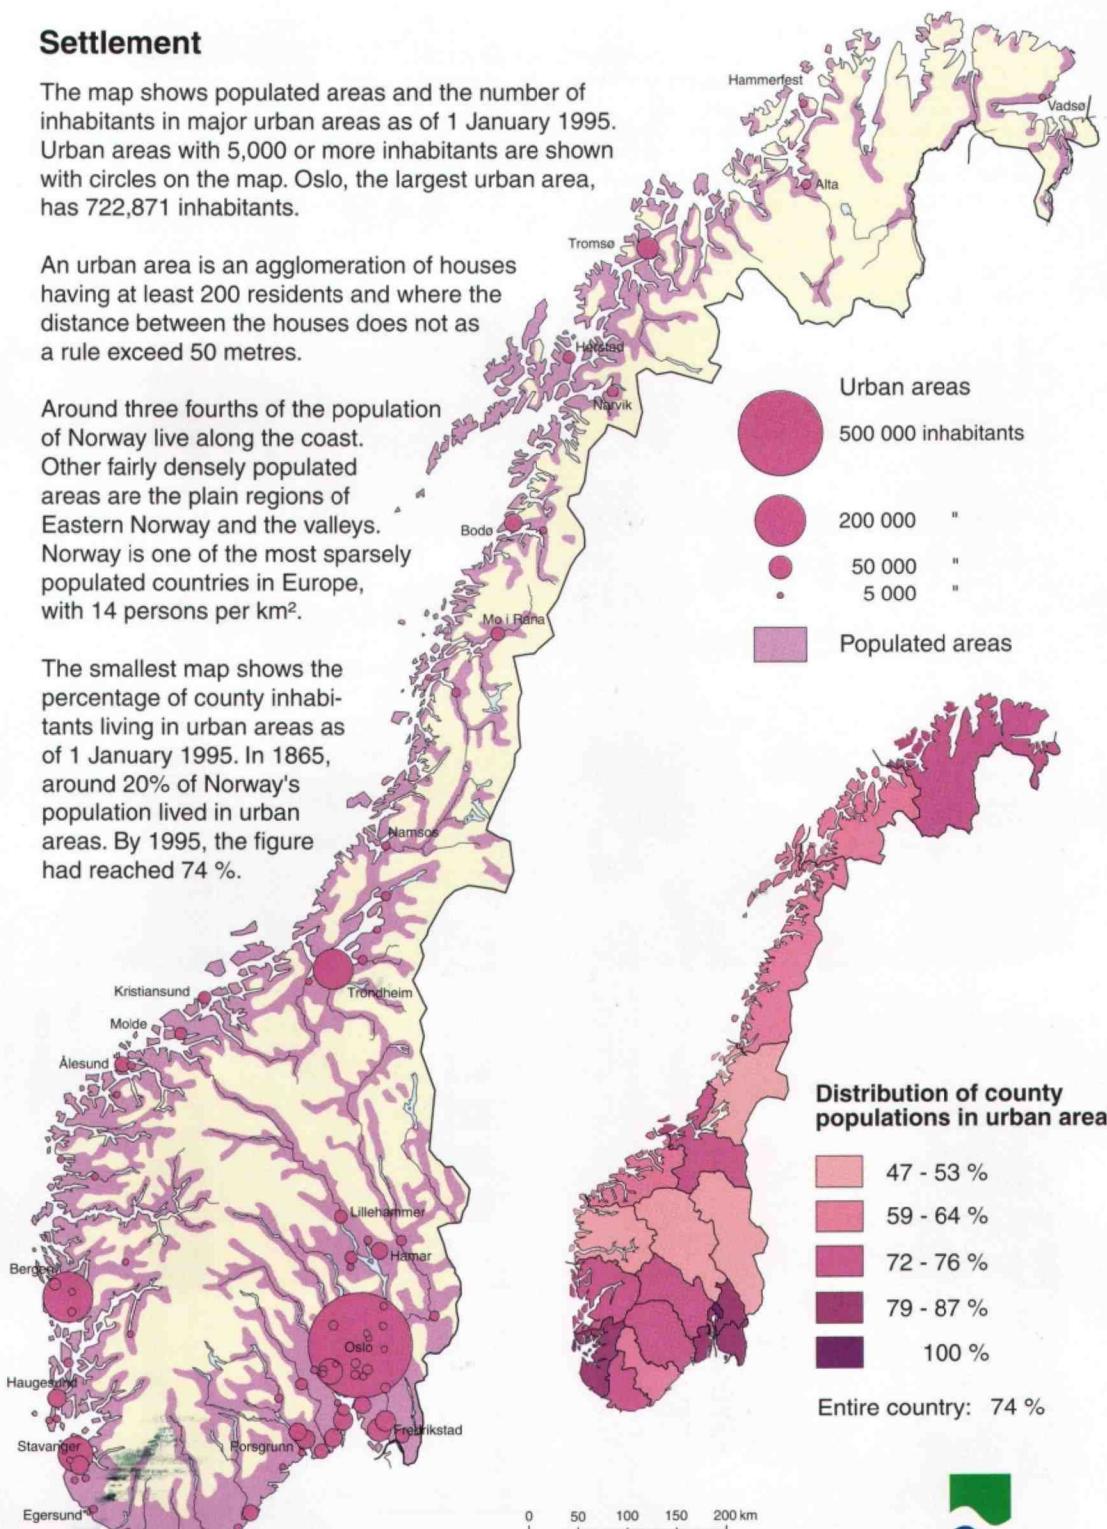

Settlement

The map shows populated areas and the number of inhabitants in major urban areas as of 1 January 1995. Urban areas with 5,000 or more inhabitants are shown with circles on the map. Oslo, the largest urban area, has 722,871 inhabitants.

An urban area is an agglomeration of houses having at least 200 residents and where the distance between the houses does not as a rule exceed 50 metres.

Around three fourths of the population of Norway live along the coast. Other fairly densely populated areas are the plain regions of Eastern Norway and the valleys. Norway is one of the most sparsely populated countries in Europe, with 14 persons per km².

The smallest map shows the percentage of county inhabitants living in urban areas as of 1 January 1995. In 1865, around 20% of Norway's population lived in urban areas. By 1995, the figure had reached 74 %.

¹The table does not include nature relics (86 geological+about 190 trees) and flora and fauna protections. ²Some areas are located in more than one county. Thus, the sum of the number in the counties is higher than the total number. ³Including fresh-water lakes. In some cases sea area is included. ⁴Flora and fauna protection areas (biotop protections). ⁵Protected according to the Svalbard law § 4. These areas are not included in the sum figures for protected areas.

¹This is the Norwegian share: 60.82 per cent. ²The production from Gyda and Gyda South is stated together. Total produced amount from these two fields is deducted from Gyda's residual reserves. ³Sales from Sleipner East and Løke is regulated in common. Total produced amount from these two fields is deducted from Sleipner East's residual reserves. ⁴This is the Norwegian share: 22.2 per cent. ⁵This is the Norwegian share: 85.47 per cent. ⁶Abandoned fields are not included.

¹Agglomerations having at least 200 inhabitants and where the distance between the houses as a rule does not exceed 50 metres. Before 1845 cities ("kjøpsteder" and "ladelesteder") are considered as densely populated areas, for 1845-1950 also agglomerations outside cities.

²Not included Svalbard and Jan Mayen. ³The population figure is probably about 15 000 too low. ⁴Figures from new preparation of the census. ⁵Not included Holt-Dypvåg, 4 583 persons. ⁶The population figure is probably about 20 000 too low. ⁷Present population. ⁸Including 15 952 persons with no information on densely/sparsely populated areas in 1980 and 25 005 persons in 1990.

¹Urban settlement: An agglomeration having at least 200 residents and where the distance between houses as a rule does not exceed 50 metres. An urban settlement is delimited independent of administrative boundaries. ²In municipalities where more than 50 per cent of the population live in urban settlements, persons with no registration on urban/rural residence have been considered as inhabitants of the largest urban settlement within the municipality. ³With assignment of codes as in the 1970 census, the population figures of the major urban settlements would be: Oslo 649 031, Bergen 181 919, Trondheim 128 159 and Stavanger 91 129. ⁴The population figure is probably about 4 000 too low.

¹In this table, children aged 18 (20) years and over are excluded from the group "families with children". Married couples with children 18 (20) years and over living at home are included in the group "married couples without children". Mother/father with children 18 (20) years and over will be found in the group "single". Figures for children 18 years and over still living with mother and/or father are given in table 46.

²Number/percentage according to age limit of 18 years for children (previously 20 years). ³Cohabiting couples with at least one child in common living at the same address. ⁴Persons who are living alone. The group may also consist of cohabiting couples with no common children.

⁵Control of the register data in 1995 has led to improved consistency between family relations and place of residence, marital status, etc.

¹In this table, children aged 18 years and over are excluded when distributing families by number of children. Married couples with children 18 years and over are included in the group married couples without children. Mother/father with children 18 years and over will be found in the group of single. So also for cohabitan couples with common children 18 years or over. ²Cohabitan couples with at least one child in common living at the same address. ³Persons who are living alone. The group may also consist of cohabitan couples with no common children.

¹Most of the children born out of wedlock have cohabitant parents. ²Minus sign indicates deficit of births. ³According to the residence of the husband.

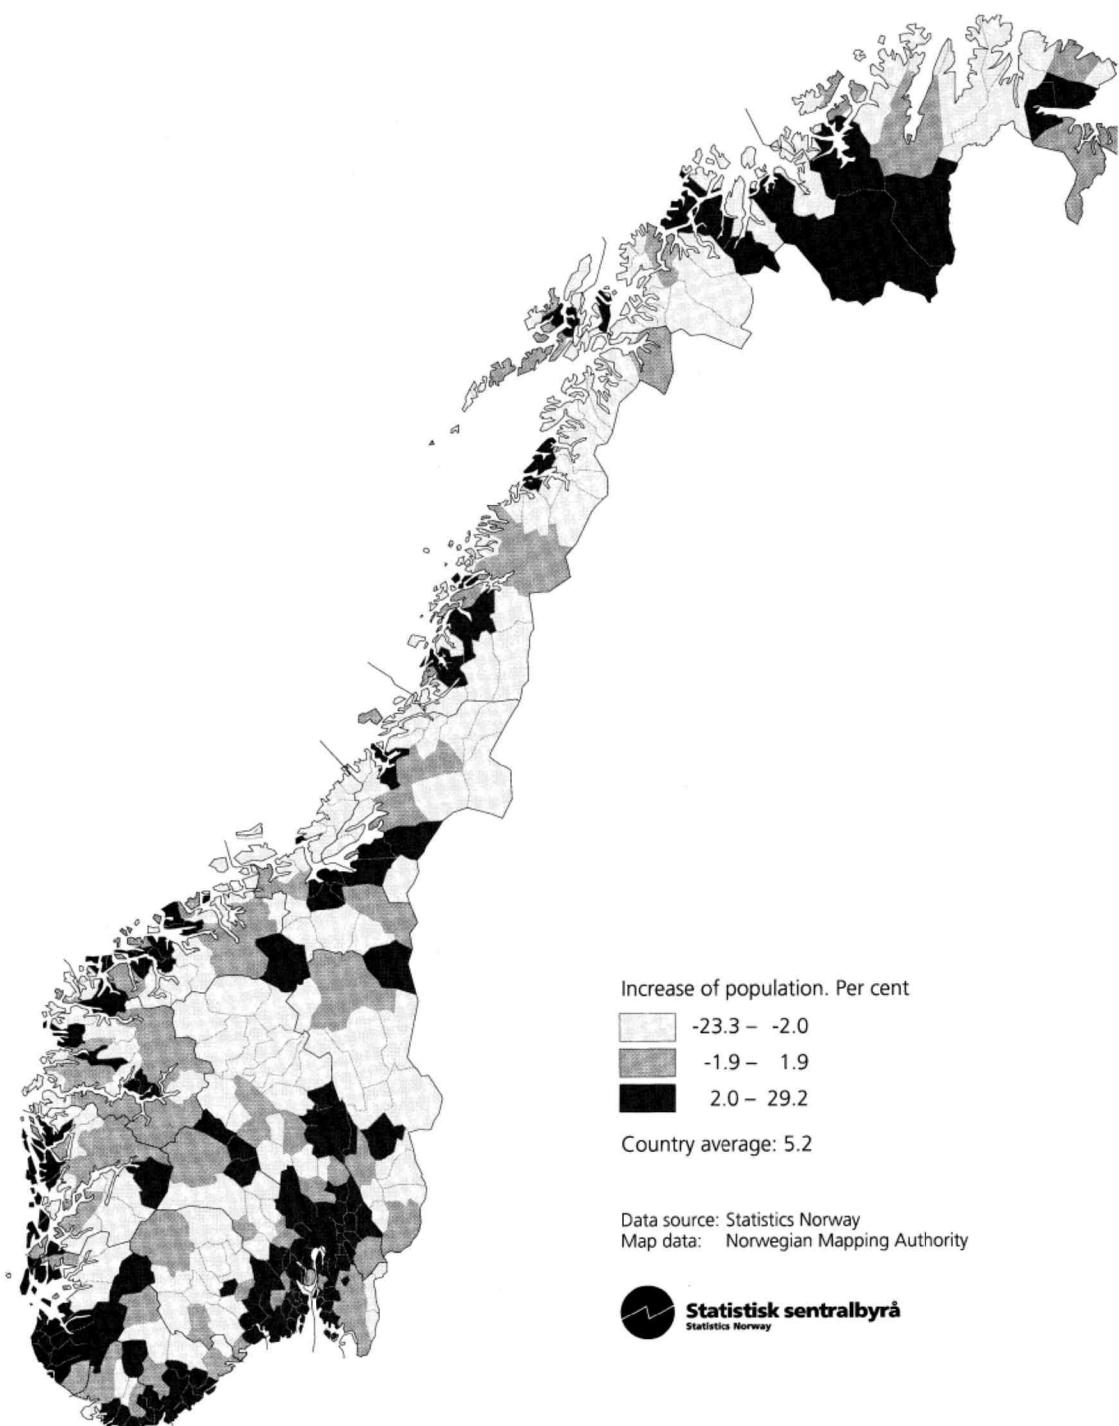

⁴Including 696 marriages with the residence abroad or unknown. ⁵Including 177 divorces with the residence abroad or unknown.

⁶Including 107 separations with the residence abroad or unknown. ⁷For the counties: From/to counties and foreign countries. ⁸Increase in population is the difference between population 1 January two following years, and may differ from the sum of excess of births and net migration.

¹According to the boundaries each year. ²According to the boundaries for the counties from 1 January 1972. Oslo and Akershus are here considered as one county. ³Figures for 1951-1957 refer to uncontrolled data from the local population registers (and are therefore less reliable than figures for later years). ⁴Refers to 1957-1960.

Others	28	18	10	2	148	82	66	42

¹ Married females include cohabitants. ²The estimates for 1995 are not quite comparable with estimates from before 1988 because of changes in the questionnaire and in the survey weeks. This is most significant for the groups Home workers and Pensioners, disabled and sick. Figures for 1996 can not be given because of changes in the Standard Classification of Occupations.

¹The statistics cover general trade. Imports directly to the Norwegian continental shelf not cleared by the customs are excluded. The exports include crude oil shipped directly from the Norwegian continental shelf, and natural gas from the Norwegian continental shelf. ²Excluding aircraft, ships and floating structures. ³Refunds of duty to the ship building industry are not deducted. In 1990-1991 these amounted to 15 and 6 million kroner. In 1992-1996 there was no refund of duty.

¹The statistics cover general trade. Imports directly to the Norwegian continental shelf not cleared by the customers are excluded. The exports include crude oil shipped directly from the Norwegian continental shelf, and natural gas from the Norwegian continental shelf. ²Denmark, Faroe Islands, Finland, Iceland and Sweden. ³Iceland and Switzerland incl. Liechtenstein. ⁴Denmark, Belgium, Luxembourg, France incl. Andorra and Monaco, Greece, Ireland, Italy incl. San Marino and Vatican City State, The Netherlands, Portugal, Spain, United Kingdom, Finland, Sweden, Austria and Germany. ⁵Croatia, Slovenia, Bosnia and Herzegovina, Macedonia, Rest Yugoslavia and Malta, Africa except South Africa, Asia except Japan, North and South America except USA, Canada and Greenland, Oceania except Australia and New Zealand.

Source: Monthly Bulletin of External Trade. Final Figures. **More information:** Division for External Trade, Energy and Industrial Production Statistics.

45

Share of Norway's imports and exports 1996, traditional commodities¹. Per cent

1. Traditional imports = imports excl. ships and oil platforms. Traditional exports = exports excl. ships, oil platforms, crude oil and natural gas.

¹The companies are classified by the Standard Industrial Classification 1994. Personal services include education, health and social services, sewerage and renovation activities, and cultural services. Other industries include agriculture, forestry, hunting, and fishing, and services attached to petroleum and gas extraction and electricity, gas, and water supply. Companies with unreported industries are included in the group other industries. ²Includes entrepreneurial income from agriculture, forestry, fishing and other industries, and net entrepreneurial income from real estate renting. ³Includes interest received, insurance received, share dividend from companies. ⁴Includes the items received taxable part of intra-group and stockholder contribution. ⁵Includes the items paid deductible part of intra-group and stockholder contribution. ⁶Includes certain companies that have not completed the other items in the tax return, whose tax has been calculated by judgement of the authorities.

¹ Cow's milk, goat's milk and cream are converted into 1 000 litres whole milk - from producer to dairy and factory for condensed and dried milk.

² Sale for consumption and for manufacture of ice-cream, bakeries etc. including production of sterilized 10 per cent cream.

ISDN connections per 31 December 1996			
Main connection, total	30 387	..
Extended connection, total	2 169	..

¹Main and short-time subscriptions and the Telenor's coin box telephones, call offices, civil servants' official telephones at residence and place of work, Green numbers, Callstream, Chat lines and CHATS. Mobile telephones are not included. The development in the number of telephone connections relates to the increase in the number of ISDN connections.

¹Dwelling property comprises detached houses, semi-detached houses, row-houses, multi-dwelling houses etc. The share of different dwelling types will vary over time. Because of this figures do not describe the price trend for a specific type of dwelling. A few transfers may include more than one dwelling unit. Dwelling properties without purchase price reported are not included.

¹Capital cities are listed first, then, alphabetically, some of the largest cities in the country. Cities that don't have suburbs are usually listed with the population in the administrative areas. The population figures for a large number of cities in less developed countries are uncertain.

²De jure population. ³Includes Oslo, Asker, Bærum, Lørenskog, Nesodden, Nittedal, Oppegård, Rælingen, Skedsmo and Ski. ⁴The capital city region including Espoo and Vantaa. ⁵The administrative units may cover more than city areas. ⁶Excluding foreign military personnel. Including military personnel outside the area. ⁷Excluding alien military forces. ⁸Former Sverdlovsk. ⁹Greater London. ¹⁰County districts. ¹¹Pretoria is the administrative unit. Cape Town is the legislative capital city. ¹²The "Standard metropolitan statistical area" is used for cities with suburbs.

¹³Including East-Jerusalem. ¹⁴Excluding countryside population. The administrative areas of Chinese cities usually include large countryside areas. The majority of the population may be living in such areas. ¹⁵The Greek part. ¹⁶The Turkish part. ¹⁷Statistical district.

524 Worlds largest cities. Summary

City, country	Year	Population	City, country	Year	Population
With suburbs					
1. Tokyo, Japan	1994	26 518 000	1. Seoul, South Korea	1995	10 229 300
2. New York, United States	1994	19 689 900	2. São Paulo, Brazil	1994	9 931 000
3. Soul, South Korea	1990	18 012 000	3. Bombay, India	1991	9 925 900
4. Osaka, Japan	1990	16 742 300	4. Karachi, Pakistan	1995	9 863 000
5. São Paulo, Brazil	1995	16 417 000	5. Jakarta, Indonesia	1995	9 160 500
6. Mexico City, Mexico	1995	16 379 400	6. Shanghai, China	1994	9 100 000
7. Moscow, Russia	1995	15 343 000	7. Moscow, Russia	1995	8 486 000
8. Los Angeles, United States	1994	15 289 400	8. Mexico City, Mexico	1995	8 483 600
9. Chongqing, China	1994	15 120 000	9. Tokyo, Japan	1995	7 966 200
10. Bombay, India	1995	15 093 000	10. Istanbul, Turkey	1994	7 615 500
11. Cairo, Egypt	1995	14 525 000	11. New York, United States	1994	7 333 300
12. Shanghai, China	1994	13 560 000	12. Delhi, India	1991	7 206 700
13. London, United Kingdom	1991	11 840 700	13. London, United Kingdom	1994	6 967 500
14. Buenos Aires, Argentina	1992	11 662 100	14. Cairo, Egypt	1995	6 955 000
15. Calcutta, India	1994	11 485 000	15. Beijing, China	1994	6 840 000
16. Beijing, China	1994	11 250 000	16. Teheran, Iran	1994	6 750 000
17. Jakarta, Indonesia	1994	11 017 000	17. Lima, Peru	1996	6 214 100
18. Teheran, Iran	1994	11 000 000	18. Bangkok, Thailand	1994	5 584 200
19. Lagos, Nigeria	1995	10 287 000	19. Rio de Janeiro, Brazil	1994	5 577 100
20. Karachi, Pakistan	1995	9 863 000	20. Bogotá, Colombia	1995	5 237 600
21. Rio de Janeiro, Brazil	1994	9 817 000	21. Lahore, Pakistan	1995	5 085 000
22. Chengdu, China	1994	9 600 000	22. Santiago, Chile	1995	5 076 800
23. Delhi, India	1994	9 500 000	23. Tianjin, China	1994	5 060 000
24. Paris, France	1995	9 469 000	24. Kinshasa, Zaire	1994	4 655 300
25. Tianjin, China	1994	9 350 000	25. Calcutta, India	1991	4 399 800

Measures and weight

Length

m	metre	km	kilometre=1 000 m
mm	millimetre=0.001 m		10 kilometres=10 000 m
cm	centimetre=0.01 m		

Area

m^2	square metre	ha	hectare=10 000 m^2
a	are=100 m^2	km^2	square kilometre=1 000 000 m^2
daa	decare=1 000 m^2		

Volume

m^3	cubic metre	I, L	litre=0.001 m^3
hl, HL		hectolitre=0.1 m^3 =100 l	
barrel (US)		US measure of volume for petroleum=0.159 m^3 =159 l	

Mass (Weight)

kg	kilogram	tkm	measure of transport performance=t · km
t	ton=1 000 kg		

Time

s	second	h	hour=60 min
min	minute=60 s	d	day=24 h

Temperature

°C	degree Celsius
----	----------------

Electric current

A	ampere
---	--------

Energi

J	joule, 1 J=1 Ws	kWh	kilowatt hour=3 600 000 J
GJ	gigajoule=1 000 000 000 J	MWh	megawatt hour=3 600 000 000 J
TJ	terajoule=1 000 000 000 000 J	GWh	gigawatt hour=3 600 000 000 000 J
PJ	petajoule=1 000 000 000 000 000 J	TWh	terawatt hour=3 600 000 000 000 000 J
Ws	watt second =1 J		
toe	ton oil equivalent 42 622 000 000 J=ca. 42.6 GJ		

Power

W	watt 1 W=1 J/s=VA	MW	megawatt=1 000 000 W
kW	kilowatt=1 000 W	MVA	megavolt ampere=1 000 000 W

Units of measure of ships

- RT Registered tonnage is a common measure of capacity or volume for ships.
1 register ton=2.83 m^3
- GT Gross registered ton. The gross registered tonnage of a ship indicated the volume of the whole ship including superstructure, deck and deck house.
- NT Net register ton. The net registered tonnage primarily indicates the size of cargo space.

Some prefixes

Prefix	Symbol	Faktor	
exa	E	10^{18}	=1 000 000 000 000 000 000
peta	P	10^{15}	=1 000 000 000 000 000
tera	T	10^{12}	=1 000 000 000 000
giga	G	10^9	=1 000 000 000
mega	M	10^6	=1 000 000
kilo	k	10^3	=1 000
hekto	h	10^2	=100
deka	da	10	=10

Topics 1995

The topic classification (revised 1995) makes it easier to locate relevant statistics within a subject of interest. The chapters of this yearbook are consistent with the highest level of the classification, while the tables are grouped at lower levels as well.

Statistics Norway has produced a publication to guide the users of the statistics. An English summary of the publication is available on Statistics Norway's home page on Internet: <http://www.ssb.no>.

00	General	07	Recreational, cultural and sporting activities
00.00	General statistics and surveys	07.01	Cultural activities
