

Non-municipal kindergartens, account

This series consists mainly of primary statistics, statistics from statistical accounting systems and results of special censuses and surveys, for reference and documentation purposes. Presentation is basically in the form of tables, figures and necessary information about data, collection and processing methods, and concepts and definitions. In addition, a short overview of the main results is given. The series also includes Statistical Yearbook of Norway

Preface

This publication provides documentation about the annual account for non-municipal kindergartens data from Statistics Norway, and includes mainly statistics from 2006.

The main results are available on Statistics Norway's web site on the Internet by subject: Education <http://www.ssb.no/04/02/>.

This publication is prepared by Ms. Anette H. Fosse. Responsible for the publication is Head of Division Mr. Terje Risberg, Division for Education Statistics.

1. Main results and tables

1.1. Main results

The parental payments have ever since 2003 form the biggest source of income to the private kindergartens. These turns around in 2003 then the parental payments in constantly larger degree form a smaller part of income to the private kindergartens. In line with the parental payments reduce the state subsidies increase. This is possible to see again in the statistics with that the parental payments covered lower share of costs of kindergarten revenues, and the state subsidies increase.

From 2006 the state subsidies was the biggest source of income to the private kindergartens. State subsidies accounted for 66 per cent of gross operating expenditures, whereas parental payments accounted for 25 per cent. The municipal subsidies accounted for 17 per cent.

The monthly cost for the age group 0-2 year-olds in an ordinary kindergarten was on national level in 2006 NOK 11 100, while then in 2002 costs NOK 9 200. For family day-care centres the corresponding rate was in 2006 NOK 7 400 and in 2002 NOK 6 000. In both types of kindergarten we can see that it has been a source of increase in the course of the last year.

Monthly cost for 3 year- olds in an ordinary kindergarten was on national level in 2006 NOK 8 300 compared with 2002 NOK 6 900. The corresponding rate for family day-care centre was in 2006 NOK 5 500 and in 2002 NOK 4 500.

For 4-6 year-olds the monthly cost in an ordinary kindergarten was on national level in 2006 NOK 5 500 compared with 2002 NOK 4 600. In the family day-care centre the corresponding rate was in 2006 NOK 3 700 while in 2002 NOK 3 000.

If we look at the costs for all age group and both type of kindergarten, then it has been a gradual increase of the monthly costs during the last year. In spite of the monthly costs increase, the parental payments reduce and the State has to pay the greater part of costs of kindergarten revenues.

1.2. About the tables

Annual account for non-municipal kindergartens is collected of all non-municipal kindergartens, but it will only be published numbers from the private kindergartens distributed on counties. In the tables it will be distributed between an ordinary kindergartens, a family day-care centres and mixed ordinary kindergarten/family day-care centres, but the Open kindergartens is out off this statistics.

2. Background and purpose

2.1. Purpose and history

The account statistics for private kindergartens presents detailed information about the activities in this sector on the basis of financial information. The statistics provides important and necessary knowledge about the subsidies transferred to kindergartens from the government and municipalities, and information about how these resources are used.

The statistics were first published in 1992. In 2003 (accounting year 2002) a new questionnaire, Q 0257, was used. The present questionnaire allows Statistics Norway to publish more detailed statistics.

2.2. Users and applications

Users include public sector agencies, with Ministry of Education and Research as main user, private organizations, individuals, international organizations and media.

3. Statistics production

3.1. Population

The account statistics for private kindergartens are organized according to the NACE-standard and include enterprises that are registered in industry division 85 Health - and social care and in service sector 327 Kindergartens

It was in 2006 emit to about 3 500 kindergarten. The account statistics only includes privately owned kindergartens, which have been in drift in this particular fiscal year. The statistics includes information from private ordinary kindergarten, private family day-care centres and mixed ordinary kindergarten/family day-care centres. The private open kindergarten, county administrative kindergarten, government-owned kindergarten and municipal kindergartens are not in this statistics.

The questionnaires emit to kindergarten, the local government and the county administrator must accept before the questionnaire return to SSB. This audit covers only trading accounting for the kindergarten. Investment accounting and balance sheet keeps out of this report.

In 2006 was there 2 975 private kindergarten in this statistics, compared to 2002 where there was 2 369 private kindergarten. It was in 2006 divide between 2 025 ordinary kindergarten, 894 family day-care centres and 56 mixed kindergarten, compared with 2002 make the same digit respectively 1 686 ordinary kindergarten, 637 family day-care centres and 46 mixed kindergarten.

3.2. Data sources

The statistics are based on a questionnaire named Q-0257. The Register of Establishments and Enterprises at Statistics Norway is used to obtain necessary information about the population.

3.3. Sampling

The statistics include the whole population of private kindergartens. In 2006 was it 2 975 kindergarten which answered the questionnaire. 68 percent was ordinary kindergarten, 30 percent was family day-care centres and 2 percent mixed kindergarten.

3.4. Collection of data

The questionnaire Q-0257 is sent out to all non-municipal kindergartens in Norway. The questionnaire will be approved by an accountant, municipal and county governor before it returns to SSB. The questionnaire Q-0257 is sent out within three months after the end of the statistical year, with a response deadline of four weeks.

The population off this questionnaire is based on extension from "Annual reports questionnaire" per 15. December the fiscal year. This sample will be before emission checked against Bedrifts og foretaksregisteret in SSB.

3.5. Response burden

It was in 2006 emit to about 3 500 unit (kindergartens). With a mean time used to complementing off questionnaire per responsibility on about 130 minute, this means about 7 580 hours or 1 010 day's work for the whole sample.

3.6. Control and revision

Revisions and corrections are carried out on the information obtained from the sample population and the structural survey.

3.7. Analysis

The accounting information off kindergarten gives grounds for analysis inn SSB, KD and research institution.

4. Concepts, variables and classifications

4.1. Definitions of the main concepts and variables

Kindergarten is according to the Day Care institutions act of 1995, kindergarten is defined as approved educational activities organized for children below the age when compulsory education starts.

An *ordinary kindergarten* means in this connection like an offer which runs in licensed premises and which have out area particularly design for kindergarten.

Family day-care centres are a kindergarten that organizes its activities in a private home, based on the premise that a kindergarten teacher is employed as an educational supervisor. The kindergarten teacher should either be attached to a normal kindergarten or the municipal administration. The regulation on family day-care centres states that at least half of the children in a family day-care institution group must be other than the home's own children.

Open kindergartens do not have a particular group of children. They are open to children accompanied by parents for playing and social gathering. The estimated number of children attending open kindergartens refers to the number of children who can visit the kindergarten at the same time. Open kindergartens are approved according to the Day Care Institutions Act, hence the kindergartens must be directed by an approved pre-school teacher, and meet other requirements set by the Ministry of Education and Research.

Mixed kindergartens are a mix of ordinary kindergartens and family day-care centres.

Operation income includes parental payments, sale/hiring out place, sale of equipment, state subsidy, municipal subsidy, other municipal subsidy, and other incomes.

Operation expenses include salary, social charges, equipment, maintenance and other operation expenses.

4.2. Standard classifications

Kind off kindergarten: Ordinary kindergarten, family day-care centres and mixed kindergartens.

County: Based on 01.01.2006

Parental payments: Revenue from parental payments.

State subsidies: Is state support.

Municipal subsidies: Is local government grants.

Other governmental subsidies: Subsidies from KD, from county municipality for instance.

5. Sources of error and uncertainty

5.1. Collection and processing errors

Sources of error in this statistics are mainly incorrect reporting of requested data and errors in recording reported data.

Returned questionnaires are registered into a database. The registration programme contains automatic controls, and questionnaires which fail to pass the controls are checked individually. Nevertheless, the results of a statistical survey may contain collection and processing errors.

5.2. Sampling errors

The questionnaire is sent out to all non-municipal kindergartens in Norway. The response rate is not 100 percent, but normally over 85 percent. The statistics is therefore representative.

6. Comparability and coherence

6.1. Comparability over time and space

The numbers of enterprises included in the statistics vary from year to year. This statistics show income and costs in private kindergartens, and do not give information about numbers of private kindergartens. The answer to numbers of private day-care centres and private ordinary kindergartens exist in the annual reports for kindergartens as of 15 December. After introduction of a new questionnaire in 2002 we had a break in the series.

6.2. Coherence with other statistics

The account statistics for private kindergartens can be viewed in connection with other statistics in Statistics Norway, for example Children in kindergartens, Households payments in kindergartens, KOSTRA and Local government's accounts.

7. Availability

7.1. Internet address

<http://www.ssb.no/barnregnp/>

The latest releases of kindergarten statistics are published as "Today's statistics" at <http://www.ssb.no/english/subjects/04/02/10/>. Other statistical material that is published by Statistics Norway can be ordered. Data will be provided according to the Statistics Act. Statistics Norway reserves the right to suppress data that may be directly or indirectly identifiable (The Statistics Act article 2-4, 2-5 and 2-6).

7.2. Language

Norwegian and English.

7.3. Publications

The main channel for disseminating statistics is the Internet.
http://www.ssb.no/english/subjects/04/02/10/barnregnp_en/
http://www.ssb.no/english/subjects/04/utdanning_tema_en/
<http://statbank.ssb.no/statistikbanken/>

7.4. Sorting and use of basic material

Primary data and information on sample units are stored temporarily in the programming language SAS, and stored permanently as text-files.

7.5. Other documentation

No other documentation is published from Statistics Norway.

1. Accounts statistics for private kindergartens. Kindergartens, by type of kindergarten and revenue in per cent of gross expenditures. 2002 - 2005
