## P R E F A C E

The present publication, International Whaling Statistics No. LXVI, embraces the results of the Antarctic whaling during the season 1969–70.

The statistical data in this publication are based on the reports sent in to the Bureau of International Whaling Statistics, Sandefjord.

Oslo, December 1970.

## INTRODUCTION

### *Regulative provisions.*

At the 21st meeting of the International Whaling Commission in London in 1969 it was decided that the pelagic catch limit for the 1969–70 Antarctic season should be 2,700 blue-whale units.

The national quota allocation for the season 1969–70 was as follows:

Japan .....	1,493	blue-whale units
U.S.S.R. ....	976	—, —
Norway.....	231	—, —
<hr/>		
Total .....	2,700	blue-whale units

The most important regulations governing the pelagic whaling in the Antarctic season 1969–70 were as follows:

1. The open season for the taking of fin- and sei-whales was from December 12th to April 7th, both days inclusive.
2. The open season for taking of sperm-whales was 8 months.
3. It was forbidden to take fin-whales under 57 feet, sei-whales under 40 feet and sperm-whales under 38 feet. Further it was forbidden to kill blue-whales, humpback whales, right-whales, grey-whales and female whales accompanied by a calf.
4. The number of baleen whales taken during the open season in waters south of 40° South Latitude by whale catchers attached to factory ships under jurisdiction of the Contracting Governments should not exceed 2,700 blue-whale units in 1969–70. (As one blue-whale unit is reckoned 2 fin-whales or 6 sei-whales.)

*Whaling period.*

The survey below shows the whaling period for baleen whales in the season 1969–70, specified for each expedition:

Expeditions	Whaling period	Catching days
<b>Japanese:</b>		
Kyokuyo Maru No. 3.....	December 12th–March 13th	92
Nisshin Maru .....	December 12th–March 23rd	102
Tonan Maru No. 2 .....	December 12th–February 17th	68
<b>U.S.S.R.:</b>		
Juri Dolgorukij .....	December 22nd–March 31st	100
Sovietskaya Rossia .....	December 12th–March 28th	107
Sovietskaya Ukraina .....	December 12th–March 31st	110
<b>Norway:</b>		
Peder Huse .....	December 12th–February 27th	78
Average excl. "Peder Huse".....		<u>97</u>

The whaling period and the number of catching days permitted for the pelagic baleen whaling operations in the seasons 1961/62–1969/70 have been from December 12th to April 7th, i.e. about 117 days.

In these 9 seasons some of the expeditions closed their baleen whaling operations at an earlier date. The average catching periods were therefore as follows:

Seasons	Average catching period	Seasons	Average catching period
1961–62 .....	115 days	1966–67.....	97 days
1962–63 .....	110 „	1967–68.....	101 „
1963–64 .....	111 „	1968–69.....	99 „
1964–65 .....	104 „	1969–70.....	97 „
1965–66 .....	103 „		

*Whaling matériel.*

In the pelagic whaling during the Antarctic season 1969–70 6 floating factories with a total of 84 catching boats and one combined floating factory/catcher "Peder Huse" of 787 gross tons were in operation.

The number of floating factories and catchers operated by the respective countries during the last 3 seasons will be seen from the survey on top of next page.

Countries	Season 1967-68		Season 1968-69		Season 1969-70	
	Floating factories	Catchers	Floating factories	Catchers	Floating factories	Catchers
Japan .....	4	43	3	38	3	38
U.S.S.R. .....	3	49	3	46	3	46
Norway .....	1	5	-	-	-	1
Total .....	8	97	6	84	6	85

Table a, below, gives the number of floating factories and catchers engaged in pelagic whaling since the season 1961-62. The table also shows the average gross tonnage of the floating factories and the average tonnage and engine power of the catchers.

**Table a.—Number and gross tonnage of floating factories and catchers engaged in pelagic whaling in the Antarctic 1961/62—1969/70.**

Seasons	Floating factories			Catchers			
	Number	Gross tonnage	Average gross tonnage per fl. factory	Number	Gross tonnage	Average per catcher of:	I.H.P.
1961-62....	21	406,402	19,352	261	170,870	657	2,723
1962-63....	17	354,581	20,858	201	141,327	703	2,957
1963-64....	16	339,132	21,196	190	134,751	709	3,011
1964-65....	15	312,302	20,820	172	123,005	715	3,041

<sup>1)</sup> Excl. "Peder Huse".

From the following survey will be seen the number of floating factories, the number of catchers and the average number of catchers engaged per floating factory from and including the season 1961-62.

Seasons	Number of floating factories	Number of catchers	Average number of catchers per floating factory
1961-62 .....	21	261	12.4
1962-63 .....	17	201	11.8
1963-64 .....	16	190	11.9
1964-65 .....	15	172	11.5
1965-66 .....	10	128	12.8
1966-67 .....	9	120	13.3
1967-68 .....	8	97	12.1
1968-69 .....	6	84	14.0
1969-70 <sup>1)</sup> ..	6	84	14.0

<sup>1)</sup> Excl. "Peder Huse".

The following survey shows the average number of catchers per floating factory specified for each country during the last three seasons:

Countries	Average number of catchers per floating factory		
	Season 1967-68	Season 1968-69	Season 1969-70
Japan .....	10.8	12.7	12.7
U.S.S.R. .....	16.3	15.3	15.3
Norway .....	5.0	-	1.0
Average .....	12.1	14.0	14.0

### Catch results.

During the Antarctic season 1969-70 the pelagic expeditions caught in all 11,949 whales, of which 13 were lost. Thus the number of whales actually processed was 11,936, as will be seen from the following survey:

Species of whales	Whales captured	Lost whales	Processed whales	Captured whales in blue-whale units
Fin-whales .....	3,002	2	3,000	1,501.0
Sei-whales .....	5,857	5	5,852	976.2
Total baleen whales .....	8,859	7	8,852	2,477.2
Sperm-whales .....	3,090	6	3,084	-
Total of whales .....	1)11,949	13	11,936	2,477.2

<sup>1)</sup> In addition a total of 42 small whales were caught.<sup>2)</sup>

The pelagically caught baleen whales (excl. small whales) converted into blue-whale units amounted to 2,477.2 units in the season 1969-70. The survey below shows the total catch in blue-whale units and the agreed global quota from and including the season 1961-62:

Seasons	Catch in blue-whale units	Agreed global quota Blue-whale units
1961-62 .....	15,252.6	<sup>1)</sup> -
1962-63 .....	11,306.1	15,000
1963-64 .....	8,429.0	10,000
1964-65 .....	6,986.1	8,000
1965-66 .....	4,090.9	4,500
1966-67 .....	3,511.8	3,500
1967-68 .....	2,803.7	3,200
1968-69 .....	2,472.6	3,200
1969-70 .....	2,477.2	2,700

<sup>1)</sup> No global quota.

In the season 1969-70 the pelagic expeditions in the Antarctic processed 2,475.3 blue-whale units yielding 268,264 barrels of whale-oil, and 3,084 sperm-whales yielding 125,027 barrels of sperm-oil.

The pelagic catch in blue-whale units in the last four seasons apportioned between the individual countries was as follows:

Countries	Catch in blue-whale units			
	Season 1966-67	Season 1967-68	Season 1968-69	Season 1969-70
Japan . . . . .	1,639.2	1,493.0	1,493.0	1,492.9
U.S.S.R. . . . .	1,071.1	1,018.7	979.6	978.6
Norway . . . . .	801.5	292.0	-	5.7
Total . . . . .	3,511.8	2,803.7	2,472.6	2,477.2

The total whaling results in the Antarctic from 1961-62 up to and including 1969-70 are given in table b, below. In table c below the pelagic results during the same period have been recorded separately.

Table b.—Total whaling in the Antarctic.

<sup>1)</sup> Right-whale.

Of sperm-whales a total of 3,090 animals was in 1969-70 caught in the Antarctic (South of 40° S.). In addition the pelagic expeditions captured 2,300 sperm-whales in waters north of 40° South Latitude.

The survey *below* shows the total catch of sperm-whales on voyage to the Antarctic, in the Antarctic (i.e. south of 40° South Lat.) and on voyage from the Antarctic, specified for each country during the last 3 seasons:

Seasons Countries	Number of sperm-whales caught in the pelagic whaling				
	On voyage to the Antarctic N. of 40° S.	In the Antarctic S. of 40° S.	On voyage from the Antarctic N. of 40° S.	Total	
1969–70 Japan .....	346	18	—	364

<hr/>					
Total .....	1,266	2,568	22	3,856	

Table d, page 13, illustrates the relation between the various species of whales killed in pelagic whaling in the Antarctic from 1961–62. During the three last seasons the fin-whale catch represented 14, 26 and 25 per cent of the total catch compared with about 71 per cent during the three first 1960-seasons. On the other hand the sei-whale catch, during the 3 last seasons, represented 69, 50 and 49 per cent of the total catch, compared with about 11 per cent during the 3 first 1960-seasons.

Table e, page 13, gives i.a. the average daily production of whale oil per floating factory as well as per catcher. The average daily production of whale-oil per floating factory in 1969–70 amounted to 463 barrels as against 460 and 399 barrels in the two preceding seasons. During the ten seasons 1949/50–1958/59 the corresponding figures varied between 1,266 and 1,690 barrels of whale-oil.

The average daily production of whale-oil per catcher in the four last seasons was 32 to 33 barrels, which is the lowest result ever recorded in pelagic whaling.

The survey on top page 13 shows the catch between each 10 degrees latitude in the Antarctic for the seasons 1958–59 and 1966/67–1969/70. Between 40°–50° South Lat. the catch in 1969/70 resulted in 1,667 blue-whale units, and this represents about 67 per cent of the total catch, as compared with about 48 per cent in the season 1968–69.

Catch in blue-whale units	Season 1958/59		Season 1966/67		Season 1967/68		Season 1968/69		Season 1969/70

	1969-70	100.0	12.8	22.2	23.9	25.5	100.0	25.9

The distribution of the various species of whales caught in the season 1969-70 was as follows:

Catch between each 10 degrees latitude in the Antarctic.

	Fin-whales		Sei-whales		Sperm-whales		Total of whales	
	Number	Per cent	Number	Per cent	Number	Per cent	Number	Per cent
40°-50° S. Lat.	1,630	54.3	5,112	87.4	1,936	62.8	8,678	72.7
50°-60° „ „	1,019	34.0	212	3.6	239	7.7	1,470	12.3
60°-70° „ „	351	11.7	528	9.0	909	29.5	1,788	15.0
70°-80° „ „	-	-	-	-	-	-	-	-
Total .....	3,000	100.0	5,852	100.0	3,084	100.0	11,936	100.0

*Catch in the different areas.*

For the purpose of obtaining more detailed information on the pelagic activities in the Antarctic the area round the South Pole Cap has been divided into the following 6 areas:—

Area I	I	between 120° West and	60° West
„ II	„	60° „	0°
„ III	„	0° „	70° East
„ IV	„	70° East	„ 130° „
„ V	„	130° „	„ 170° West
„ VI	„	170° West	„ 120° „

From the following survey will be seen the whaling results in blue-whale units in the individual areas during the last 9 seasons:

Seasons	Area I Blue-whale units	Area II Blue-whale units	Area III Blue-whale units	Area IV Blue-whale units	Area V Blue-whale units	Area VI Blue-whale units	Total blue-whale units	
	Per cent	Per cent	Per cent	Per cent	Per cent	Per cent		
1961-62..	1,809	11.9	3,729	24.5	6,488	42.6	1,792	11.8
1962-63..	853	7.5	3,109	27.5	5,491	48.6	1,010	8.9
1963-64..	22	0.3	4,368	51.7	2,808	33.2	367	4.4
1964-65..	40	0.6	4,918	69.8	687	9.7	658	9.3
1965-66..	14	0.4	2,439	59.7	963	23.6	106	2.6
1966-67..	23	0.6	299	8.5	1,922	54.8	659	18.8
1967-68..	-	-	119	4.2	782	27.9	753	26.9
1968-69..	77	3.1	47	1.9	571	23.2	986	39.9
1969-70..	-	-	232	9.4	1,108	44.8	853	34.4

The catch in Areas II and III (between 60° West-70° East) amounted to 54 per cent of the total catch in 1969-70 as compared with 25, 32 and 63 per cent in the three previous seasons. On the other hand the catch in Areas IV and V (between 70° East-170° West) was 45 per cent as against 63, 47 and 27 per cent in 1968-69, 1967-68 and 1966-67, respectively.

The total number of sei-whales and sperm-whales killed in the different areas during the two last seasons were as shown on top of page 17:

Areas	Sei-whales caught				Sperm-whales caught			
	Season Number	1968/69 Per cent	Season Number	1969/70 Per cent	Season Number	1968/69 Per cent	Season Number	1969/70 Per cent

,, VI.....	552	9.6	156	2.6	163	6.1	50	1.6

Table h, below, contains a summary of the number of whales killed by species in each area during the period 1931/32–1969/70. Of a total catch of 950,473 whales during this period about 55 per cent have been fin-whales, 20 per cent blue-whales, 11 per cent sperm-whales, 11 per cent sei-whales and 3 per cent humpbacks. About 63 per cent of the total catch have been taken in Areas II and III, i.e. from 60° West eastwards to 70° East Longitude.

Table h.—Number of whales killed during the seasons 1931/32—1969/70.

#### *Average size of the whales killed.*

Table j, above, gives the average size of whales killed in the pelagic whaling operations and from South Georgia in the seasons 1961/62—1969/70.

#### *Mature and immature whales.*

Table k, page 21, gives particulars of the catch of mature and immature whales in absolute and relative figures during a series of seasons.

Whales regarded as mature, see page 22.

Table l, page 22, gives a survey of the pelagic whaling results of the individual participating countries as from 1961/62 regarding the number of whales killed, oil production and number of catchers employed.

<sup>1</sup>) Barrel = 170 kg. (Barrel = abt. 1/6 long ton. 1 long ton = 1,016 kg.)

Whales of the following sizes are regarded as mature:

Blue-whales: Female .....	77 feet and over
Male .....	74 —,—
Fin-whales: Female .....	65 —,—
Male .....	63 —,—
Humpbacks: Female .....	41 —,—
Male .....	40 —,—

#### *Catch results in relation to the whaling matériel and whaling period.*

From the survey on next page it will be seen that there has been a great decline in the average result of blue-whale units per catcher day during the latest seasons. Thus the catch in blue-whale units per catcher day amounted to 0.68 in 1960–61 and only about 0.30 in the last five seasons.

Seasons	Area I	Average result of blue-whale units per catcher day.

### *South Georgia.*

There were no whaling operations from South Georgia during the last five seasons.

Details on the whaling results from South Georgia are given in earlier publications of the International Whaling Statistics.

### *Oil production by participating countries.*

In table m, page 24, the total whaling results in the Antarctic during the seasons 1961/62-1969/70 have been distributed in respect to the individual participating countries. During the last 5 seasons the percentage proportion of the oil production of the individual countries has been as follows:

Countries	1965/66 Per cent	Oil production during the last 5 seasons			
		1966/67 Per cent	1967/68 Per cent	1968/69 Per cent	1969/70 Per cent
Japan .....	39.8	32.1	40.7	42.0	40.9

Total .....	100.0	100.0	100.0	100.0	100.0

### *Oil production per blue-whale unit.*

The average output of oil per blue-whale unit from and including the season 1961-62 has been recorded in table n, page 25. For the pelagic expeditions the average output was 108.4 barrels in 1969-70 against 110.2 and 114.9 barrels during the two preceding seasons.
