

Statistics Norway, 5 June 2020

Indicators for Sustainable Development Goals on <https://www.ssb.no/sdg-en>

Metadata, English version

The Sustainable Development Goals (SDG) were adopted by the UN member states in 2015 and consist of 17 goals and 169 targets that look at the environment, economy and social development in a joint plan for development towards 2030 ([A/ RES/70/1](#)). The “facts page” shows developments within selected indicators, determined at a global level, to follow the development of the SDGs.

Change log:

2020.06.05 – New indicator entered - 13.2.2: «Total greenhouse gas emissions per year»

Goal 1

Indicator	1.2.2 Proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions
Indicator available	1.2.2 Percentage of persons with persistent low-income
Target	1.2: Reduce poverty by at least 50%
Geographical coverage	Norway
Unit of measurement	Per cent
Definitions	<p>The indicator is based on the household's total income after tax. To compare economic welfare in households of different sizes, economies of scale have to be taken into account. This is done by calculating consumption weights according to the EU scale. We assign first adults in the household weight = 1, then the next adult weight = 0.5 and children under 17 years weight = 0.3. The household's total income after tax is then divided by the consumption weight to arrive at income after tax per consumption unit, also called equivalence income. In this indicator we calculate the amount for each of the average equivalence income over three consecutive years (at constant prices).</p> <p>Persistent at-risk-of poverty is defined by taking into account the amount that constitutes the average median income (equivalence income) for different three-year periods. People who belong to a household that, on average, over three years have an after-tax income per unit of consumption below 60 percent of the median for the entire population, is defined as "person with persistent at-risk-of poverty"</p> <p>There are also other ways to define at-risk-of poverty rates.</p>
Available disaggregation for indicator	None

Goal 2

Indicator	<i>2.5.1 Number of plant and animal genetic resources for food and agriculture secured in either medium or long-term conservation facilities</i>
Indicator available	2.5.1 Plant breeds for which sufficient genetic resources are stored
Target	2.5: Maintain the genetic diversity in food production
Geographical coverage	Norway
Unit of measurement	Number
Definitions	Plant diversity preserved in gene banks is often described as an accession, in the sense: A genetically unique unit of a plant genetic resource.
Available disaggregation for indicator	None

Goal 4

Indicator	4.1.1 Proportion of children and young people at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex
Indicator available	4.1.1 Proportion of children and young people at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex
Target	4.1: Free primary and secondary education
Geographical coverage	Norway
Unit of measurement	Per cent
Definitions	Minimum proficiency level (MPL) is the benchmark of basic knowledge in a domain (mathematics, reading) measured through learning assessments.
Available disaggregation for indicator	Reading, mathematics, by sex
Source	Ministry of Education and OECD http://uis.unesco.org/sites/default/files/documents/countryprofiles/NO.pdf

Indicator	11.3.1 Ratio of land consumption rate to population growth rate
Indicator available	11.3.1 Ratio of land consumption rate to population growth rate
Target	Target 11.3: Inclusive and sustainable urbanization
Geographical coverage	Norway
Unit of measurement	Ratio
Definitions	This is a ratio between urban growth and population growth. If the number is 1 then the urban area growth is as large as the population growth. If above 1, the area growth is greater than the population growth (this can be interpreted as undesirable development) If below 1, then the area growth is less than the population growth (this can be interpreted as a desired development).
Available disaggregation for indicator	None
